The Oyen News

Franklin Van Horne Wins Oratorical Contest - Oyen Division

Franklin Van Horne was awarded the decision in the Oyen district oratory contest, held last Wednesday evening in Oyen Theatre. Five contestants in all took part and the unusually fine orations were enthusiastically received by a large and keenly interested audience.

Those who heard Franklin in the Oyen School elimination contest noticed a marked improvement in his work and the decision of the judges, Rev. J. Douglas of Alonsk, Rev. C. H. MacDonald of Youngstown, and Mr. J. J. Kelly of Oyen, reflect the choice of the audience. E. Redin of Ceresk, Murdoch McPherson of Chinoak, Maynard Orpen of Ensisle school district, and Miss Roberta Shular of Sibbald, were the other contestants.

Following the contest a reflecting program was contributed by Mrs. Richardson, Mrs. Hughes and Mary Hughes, and Miss Ritchie of Ceresk, Mr. J. W. Robinson, Mr. and Mrs. Robert Nisbet and Miss Colwell's class who prettily staged folk dances and a May polka.

Since last Wednesday Franklin has been in extremely poor health and doubts were felt as to the advisability of his going to Calgary to compete in the Southern Alberta contest tomorrow, but his condition was sufficiently improved to day to permit him to leave to-night when he will be accompanied to this city by his mother.

An Easter party given by Mrs. A. C. Robinson last Thursday afternoon at the school, was thoroughly enjoyed by her young pupils and their parents.

"How ja like my dress, it's a sample?"
"You don't get much for no thing 'these days, do you?"

Municipal Hospital A Live Issue

With good health all things are possible! Should ill health overtake you, what about your own municipal hospital to restore you to health and strength—to take care of the breakdown of the body engine. A municipal hospital provides a place where the necessary treatment can be given in your own community. There never has been a time when hospitals have been as efficient as they are today. Do you not wish high standards of efficiency in matters pertaining to your health?

He who has health has hope; he who has hope has everything. Safeguard your health, your family's health and that of the community by the establishment of a municipal hospital, where your medical advisor, whenever he may happen to be, can give better and more efficient service, for a hospital of this type stimulates one to greater things besides its presence causes much more satisfactory work to be done, as well as binding the community together in one common cause. With a hospital of this type, one need never fear an emergency condition, for everything required in equipment would be available. Provide the right type of hospital and you automatically attract the right type medical practitioner and nurses, who are actually necessary in every community.

It is only in recent times that hospitals have become within reach of the man with small income; this has been made possible by community co-operation in the establishment of municipal hospitals. For years the man of moderate means thought only of a hospital when sickness was a matter of life and death, because he felt he could not afford hospital treatment unless it was a case of that kind. Now, through the municipal hospital system, with its insignificant cost, hospitalization can be introduced into a community, where it is within reach of all, and available to all at all times.

This campaign that should strongly commend itself to you. It should cause you to use every effort toward establishing a municipal hospital here, not only for your own physical welfare, but for the community as a whole, of which you are a part.

In addressing the Kiwanis Club of Calgary recently, Mr. Allan Fraser said, "Good hospitals are just as important as adequate police and fire protection. I am not an advocate of free hospitals, but I am an advocate of hospitals within the purse of every citizen." This is just what municipal hospitals provide. He said, "Often think of hospitals in comparison with fire and police protection. No matter how humble my home may be I call the fire department in case of need, without thought of cost. If a member of my family is stricken it is a greater calamity and one I should be in a position to meet with equal facility."

In most places hospitals have been provided to protect health. Are we not ready to fall in line and establish a municipal hospital, that the health of this community may be protected against the invaders—accident, sickness and disease?

PRODUCT OF GENERAL MOTORS OF CANADA, LIMITED

The Farmyard Hen Produced In Canada Last Year Over 253 Million Dozen Of Eggs

Some one has figured that if the eggs laid in Canada in 1927 were placed end to end they would girdle the universe four and a half times. It certainly staggers the imagination to comprehend over three million eggs or 115,000 miles of them. And there are the farm eggs only. Dear knows how many more thousands of miles should be added for the eggs laid in poultry houses in the cities and suburban areas in Canada, but the number must be considerable. All of them, whether from farm or city, disappear down the national pullet at the rate of 4,000 per minute. The rate is of course much faster at meal times, for these figures are on a 24-hour basis. Still there are not enough to satisfy the national appetite and some eggs have to be imported into Canada.

Canadians are the greatest egg-eaters on the face of the globe and consumption has been increasing tremendously, especially since egg-grading regulations came into force. It is estimated that Canadians now consume something like 327 eggs per capita per annum. Production of farm eggs in 1927 equaled 220 eggs per capita. While production is increasing rapidly, principally through the breeding of better hens rather than increasing the flocks, consumption is increasing at a still more rapid rate as indicated by the great needs of imports over exports of eggs.

Canada imported roughly 31 million dozen eggs in 1927, and exported 11,000,000 in 1927. The excess of imports over exports rose by a million dozen over the previous years. There are figures on eggs in the shell. Eggs other than in the shell, or n.o.p., as they are shown in trade statistics, are also imported into Canada in some vast quantities in recent years. Most of the eggs in this class come from China and the total amount imported in 1927 amounted to slightly over 2 million dozen, compared with 1.3 million dozen in the previous year.

The unfavorable trade balance resulting from excess of imports over exports of eggs amounted to roughly \$1,000,000 in 1927. The excess of imports over exports of eggs in the shell, however, shows figures may appear large but they fade away by comparison with the farm egg production. In 1927, over 253 million dozen valued at over \$50,000,000. The long and short of it is that Canada just barely failed to meet her egg requirements last year by about 31 1/2 in-the-shell eggs per capita to which must be added the imports of eggs amounting to perhaps two eggs per capita. Domestic egg production is not enough to meet the national appetite therefore by roughly one-half dozen per capita—a trifling amount. It is true, but the shortage is increasing.

What is the outlook? Can Canada meet her own egg requirements in the future? Can she regain her lost export trade in eggs? In regard to the first of these questions, farm egg production is increasing very rapidly. In fact there has been an increase of 10 per cent. since 1921. In the same time the number of hens etc. on Canadian farms has increased by only 35 per cent., showing that the production per hen has increased considerably since 1921, due to the rearing of better birds for egg-production. The process of weeding out undesirable birds and substituting flocks of proven high production strains appears to have borne excellent results in the past year. Increase of 6.8 per cent. in production being recorded for 1927 over 1926, while the number of hens etc. in farm flocks increased by only one-fifth of one per cent. Even without increasing the farm flocks the industry holds on 1927 just about even up with increasing population and the increasing appetite of Canadians for eggs. There is still room for very great improvement in the farm flock from the egg-production standpoint, but the process cannot go on indefinitely and the farm flock must eventually be increased to keep up domestic supplies of eggs if consumption per capita goes on climbing.

If Canada had the eggs she could not doubt find a market for them in Great Britain, says the Department of the Interior, through its Natural Resources Intelligence Service. In fact the market for her surplus eggs has always been there, but since 1920 the exportable surplus has never amounted to much. It is the magnitude of the market in the United Kingdom and what could be done with poultry in Canada if prices were attractive. The United Kingdom spent over \$80,000,000 a year on im-

ported eggs in 1925 and 1926. The Imperial Economic Committee reports that requirements from home and Empire sources are 5,700 million eggs a year or 475 million dozen—nearly twice Canada's farm egg production—this with a consumption of only 125 eggs per capita. The system of uniform grading and government certification to which they have been subjected has enabled Canada's eggs to command a premium over all other eggs on the British market. If enough of them were to be had, John Bull might count Jack Canada's title to champion egg-eater of the world. But as it is only 5 out of every 100 eggs consumed in Great Britain, according to last reports, come from Canada. The United Kingdom itself supplies 433; Irish Free State, 95; China, 138; Denmark, 121; Russia, 47; Netherlands, 25; Poland, 22; Egypt, 22; Belgium, 21. South Africa supplies 5 and Australia 3, so that Canada does not rank behind the other British Dominions, but what a big thing it might be for Canada if she could get a big slice of this egg trade and especially if consumption per capita increases as it has in Canada.

Good Future For Prince Rupert

Will Soon Become Important As A Grain Shipping Port

In a speech delivered at a banquet of Prince Rupert pioneers, Mr. McMorris, mayor of the city, regretted that he could not divulge the result of his recent visit to Ottawa until he had submitted a formal report to the council, but he assumed the gathering that the pioneers had made no mistake in establishing themselves in Prince Rupert. He predicted that within two years at least twenty million bushels of grain would be shipped overseas through Prince Rupert and that by the next ten years, all would be amply recompensed for their unwavering faith in the future of the city.

INTELLECTUAL BRITAIN

The Influence Of Environment In Racial Development

John Bull takes his place among the highbrows. Professor D. G. Parsons, English anatomist, says that for the past hundred years the skulls of his fellow-countrymen have been increasing in length and height. He adds that "this is a change which can be attributed only to environment, since it is repeating no known ancestral shape." The discovery is regarded as of sufficient importance to be laid before the Hoyal Anthropological Society. Such impressive fashion are we given to understand that the highbrows of today are the descendants of the lowbrows of yesterday. And we are told further that "the discovery of this growth upward is a strong argument for the influence of environment in racial developments and underlines fact in craniology as a guide to racial history."

Information is not at hand as to how Professor Parsons reached his conclusions. Was it a case of actually measuring the skulls of the departed, thus giving the lie to the assertion that dead men tell no tales? Did the anatomist carry science to the portrait gallery? Or was the latter's guild asked to supply figures for use in the comparison? It is conceivable that the gathering of grandfathers' hair might play its part in the undermining of craniology as a means of determining racial relationships. But however the result was obtained, there is reason for rejoicing because of it. It is gratifying, everywhere but in Chicago, to be told that the English are becoming highbrows. But the information is, of course, to be understood as applying to the English of the future, the highbrows of Merry England in the brave days of 1927. No communication to the Royal Anthropological Society will cause Francis Bacon, John Milton and Shakespeare to be numbered among the lowbrows. —Boston Transcript.

Manitoba Mine Is Gold Producer

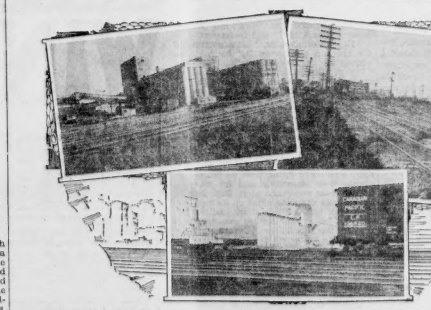

The Central Manitoba Mines have shipped 3 gold bricks since the mill began running a few weeks ago. Development work continues and ore reserves are being increased. The supply present capacity for three years. The ore is improving in quality with depth. T. C. Anderson, vice president, states, "Exploration with diamond drill is in progress on sections of the property that have not yet been opened up."

Speed Of Radio

If a radio's modern high-powered radio did not lose its speed, it could travel around the world in a little over 15 hours, while the same radio from radiating station would cover the same distance in less than one-seventh of a second.

Thermometers sent up in experimental balloons have noted a slight change in temperature beyond the altitude of 6 1/2 miles.

C. P. R. Adds Further Trackage

Over one hundred miles of track by the railway track of the Canadian Pacific Railway near the harbour of Vancouver. The plan being carried out at Pier B-C at the foot of Granville Street, and in the proposed new C.P.R. yard at the south end of the second Narrows Bridge, and of the allowance for further additions when necessary.

Mr. C. A. Cottrell, C.P.R. General Superintendent, has issued figures demonstrating the vast extent of ex-

IS VAST ORGANIZATION

Uplieper Of London Hospital Costs Million and a Quarter Dollars Yearly

"The Prince of Beggars" has made what he thinks may be his final appeal. In the last 30 years he has begged from the public many millions of dollars, and he is still asking for more. Surely, therefore, he deserves the title which the newspapers have bestowed upon him. "Deserved" is the right word, for he has begged whole-heartedly in a good cause—the cause of suffering humanity. The London Hospital, the largest hospital in this country, which needs an income of over a million and a quarter dollars yearly for its upkeep, is founded in 1749 with a subscribed fund of 100 guineas, and soon afterward the secretary had the unpleasant duty of informing his committee that they had just one shilling left in the bank.

But the hospital survived the crisis, and in the course of the ensuing 180 years has developed, after many vicissitudes and revolutions, into the present vast organization.

The London Hospital has eighteen operating theatres, fourteen special clinics, a laboratory, a dispensary, 3,000,000 pieces a year, four convalescent homes and surgical annexes, a nurses' training school, a medical college and laboratories and equipment as complete as money and brains can provide. Such a hospital, run on the voluntary system, with its doors thrown open generously to every sufferer from every disease, needs a huge income; and it is due mainly to the mercenary proclivities of "The Prince of Beggars" that it has been able to carry on its great work.

Becomes Paying Industry

Texas Oil Workers Make Money Selling Rattlesnake Skins

Dane Fashien has interfered with a pasture of workers in the oil fields of West Texas. Men who work about the derricks once delighted in tossing sticks of dynamite or small cans of kerosene into dens of rattlesnakes. But dynamite decreases snakeskin shoes and gives the reptiles a commercial value. So the workers, who have been none too prosperous because of the slump in the oil industry, now drag the snakes from the dens with hooked poles and collect the skins, which are dried in the sun and shipped to New York. The workers, where they bring price which nicely augments the wages of the laborers.

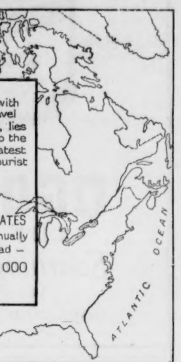

Right At That

To test their knowledge of English the native students in a Chinese Christian college were asked to give in their own languages the meaning of certain phrases, including "Out of sight, out of mind." One of them summed up the other situation in two words—"Invisible, insane."

Canada's Matchless Advantage In Relation To The Growing Tourist Trade From U. S.

If the volume of United States tourist travel continues to grow at anything like its recent rate, it will be only a matter of two or three years until the amount of money expended by Americans abroad reaches the colossal sum of a thousand million dollars a year. For 1926, according to the United States Department

to roughly \$250,000,000 a year. And there is ample reason to believe that the total can be doubled in the next ten years. Canada possesses an endless variety of attractions for holiday seekers of all kinds, plus a 4,000-mile coastline facing the country, which constitutes the world's wealthiest and largest source of tourist travel. Tak-

Canada, with its endless attractions, lies next door to the world's greatest source of tourist trade. UNITED STATES citizens annually spend about \$761,000,000 on all in all, there is probably no other country so favorably situated for attracting tourist trade. The warm welcome which Canadians extend to visitors is an ever-growing influence in directing travel toward the Dominion. Those who come gladly return again and bring their friends with them.—Charles Stewart, Minister of the Interior.

Banting Sweet Corn

New Variety That Matures in Less Than Seventy Days

The new Banting corn originated by the Division of Horticulture of the Experimental Farms department, is proving so valuable in the Prairie Provinces that steps are being taken to produce large supplies of seed. This variety of sweet corn, practically equal to Golden Banting, becomes ready for use in less than seventy days, which makes it adaptable for general use in the home and market gardens of colder parts of the Dominion. A considerable quantity of seed of the Banting corn was produced at the Morden, Manitoba, experimental station last year. This year the stock is to be multiplied at the other Western Experimental Stations.

Golden Roses

Five Hundred Varieties Have Been Tested Out in Canada

There have been under test at the Central Experimental Farm the forty varieties of roses in Canada. The results of the investigation are given in a bulletin headed "Hardy Rose Varieties in Cultivation." It is a strong, healthy grower with an abundance of bloom throughout most of the season. Another very popular hybrid perpetual is Mrs. John Laing, a rosy pink, fragrant variety which does well in town gardens. The third variety is the Hugh Dickson, a very attractive crimson, shaded scarlet flower, vigorous, and a free bloomer. Hybrid Tea roses recommended are Caroline Testout, a reliable, bright warm pink variety, Gruss and Tropicana, a very fragrant variety of the crimson rose, and La Touche, a pale pink. Perpetual roses recommended are Mme. Edouard Hermet, a free vigorous bloomer with a wonderful variety of coloring, Souvenir de Claudius Pernet, a beautiful yellow flower, and Wm. W. W. Hardy, a hardy continuous bloomer of unusual color.

B.C. Lumber Production

Lumber production in British Columbia in 1927 totalled 740,235,000 feet board measure, an increase of 27,600,000 feet over 1926. The principal export markets for British Columbia lumber and forest products were the United States and Japan. The value of the lumber production in the province last year is placed at \$82,075,000.

World's Grain Show

Promoters of the proposed World's grain show to be held at Regina, Saskatchewan, in 1932, are forwarding their plans as rapidly as possible. The Saskatchewan Legislature and the Regina Industrial and Agricultural Association have endorsed the project. The provincial government will now be approached with view of getting its approval and support.

CHEVROLET CONFIDENCE! the Basis of Every USED CAR Sale

CONFIDENCE in the dealer is even more important in the purchase of a used car than in that of a new car. For that reason it will be to your advantage to buy from a dealer whose reputation for honesty and integrity assures your satisfaction.

The good name we have won in our representation of the Chevrolet car protects you in the purchase of a Used Car here. We cannot afford to sell anything but a good car at a fair price. Come in and investigate before you spend your money.

Here and There

(32)
Work on the Royal York new hotel at the Canadian Pacific Railway in Toronto, is ten days ahead of schedule and there is now every probability that it will be completed by May 1, next year. It will tower 255 feet above the sidewalk, being the tallest building in the British Empire.

A. Alberta has been appointed general manager of hotels and bus-slow camps east of Fort William, operated by the Canadian Pacific Railway and its subsidiaries, general manager of hotels and bus-slow camps from Fort William to the Pacific. The appointments were consequent on the death of C. E. Fisher, his general passenger traffic manager of the railway.

Pelle Huld, 15-year-old Danish boy, who is travelling round the world in 45 days, passed through Montreal and the east of Canada, recently on his way to Vancouver, whence he will sail by Canadian Pacific All-Red route to Yokohama. The exploit is in commemoration of the hundredth anniversary of the birth of Jules Verne, whose book "Around the World in 80 Days" has always been a favorite with boys.

Fort William—Elevator capacity at Fort William will probably total 100,000 bushels by 1932. Present storage capacity of the twin cities is recorded as 72,500 bushels and between 3,000,000 and 10,000,000 bushels will be added before the 1932 crop is garnered. Expansion in the following two years will take about 20,000,000 bushels, one of the largest terminal building projects either in the history of the lake-head ports or any of the other centres of the continent.

Winnipeg—So many applications have been received from farmers in Manitoba to ensure the services of youths who are being sent out from Great Britain under the Boy Immigration scheme, that the British Government has requested the authorities to increase the number from 50 to 100. Hon. Albert Prefontaine, Minister of Agriculture, stated that 175 farmers have filed applications for boy help. It is expected that the first batch of youthful immigrants will reach Manitoba late in March.

Substantial reductions in express charges on packages up to 15 lbs. in weight originating in Europe and with Canadian destination have been announced by the Canadian Pacific and Canadian National Express companies. These cuts run as high as \$1.75 and for the purpose of the change Canada has been divided into three zones, Maritime Provinces and Quebec, Ontario, and Prairie Provinces and British Columbia. With no matter how widely separated points within this may be.

Wetaskiwin—Wetaskiwin district has the distinction of being the home of a Shorthorn cow which holds the record for all Canada in the production of milk and butterfat as a three-year-old. She is owned by J. O. Harvey in the northwest part of the city, and a letter from Ottawa advises that the production of this cow has never been equaled in Canada. Gladys No. 20869 produced 10,504 lbs. of milk and 595 lbs. of butter fat in a lot extending over 325 days. She is now undergoing her test as a four-year-old and is averaging about 65 lbs. of milk a day.
